AMRITA SUPPLY LLC

Tronex International, Inc., was founded in 1989 with the great vision to become a world-class manufacturing, marketing, and distribution enterprise. The progressive Tronex business model merges superior quality customized products with an unparalleled culture of service and responsiveness. Our core conduct and approach are rooted in what we believe are the important values of integrity, delivering upon commitments, and the true spirit to be of service.

For more than 25 years, Tronex has steadily grown to become one of the most reliable and well-respected national brands and leading providers of innovative disposable Personal Protective Equipment (PPE). Our advanced PPE solutions include vital safety and disposable infection-control products, such as examination and general-purpose gloves, head-to-toe protective apparel, face masks, N95 respirators, elastic bandages, and surgical/operating room protective products.

All Tronex Brand products are meticulously crafted in our state-of-the-art ISO-certified and U.S. FDA-registered manufacturing facilities to ensure optimal quality and compliance with clean air, water, and energy best practices to promote a safer environment for us all. Our sophisticated, vertically integrated supply chain and inventory planning system provides a key competitive advantage, enabling us to commit specific inventory for each customer and deliver industry-leading fill rates, cost efficiencies, consistent quality, and superior supply dependability for our treasured customers across the nation and around the world.

Tronex's long-term partnerships with the leading healthcare Group Purchasing Organizations, major health systems throughout the United States, national quality foodservice brands, leading government institutions, and a number of Fortune 500 companies are a testament to our expertise and capacity to consistently perform and reliably deliver safe, quality product solutions. Tronex Brand products are recognized nationally and internationally as some of the most finely crafted and specialized in design, exceeding both the specifications and performance requirements for each application, while delivering exceptional value and minimizing environmental impact.

Tronex is proud to have received numerous Supplier Excellence and Business Leadership awards, as well as various Diversity and Philanthropic awards – all of which exemplify our unwavering commitment to honor the best interests of our diverse customers, the patients they serve, and the communities that we affect, which is the driving force behind the dedication and teamwork of our entire organization.

# EXAMINATION GLOVES

Disposable examination gloves are one of the most important first-line levels of protection for clinical staff and patients. Despite how straightforward products in the category may seem, the material composition, quality standards, and manufacturing intricacies are all major factors that impact how an exam glove performs and protects during use in its intended applications. Careful selection of the proper brand and style of exam glove to meet the critical quality, performance, protection, and value demands within each setting of a facility is essential to ensure that patients and staff alike are properly protected.

AMRITA SUPPLY LLC

# NITRILE EXAMINATION GLOVES

Tronex disposable nitrile examination gloves are carefully manufactured from unique formulations to provide superior material softness for outstanding comfort, durability, tensile strength, and elasticity. 100% latex free, our advanced nitrile exam gloves offer exceptional protection and resistance to chemicals, punctures, abrasions, oils, and temperature extremes when compared to latex or vinyl gloves.

## NITRILE FEATURES

Tronex nitrile exam gloves feature an ambidextrous fit with beaded cuffs for easy donning. They meet or exceed all industry standards for safety and quality, and comply with the following specifications:

- 100% Latex & Powder Free
- FDA 510(k) Approved for Medical Use
- ASTM D6319 Specification for Nitrile Examination Gloves for Medical Application
- ASTM F1671 Test Method for Resistance of Materials by Blood-Borne Pathogens (Viral Penetration)

Additionally, all Tronex chemotherapy-rated nitrile exam gloves meet and exceed ASTM D6978 Resistance of Medical Gloves to Permeation by Chemotherapy Drugs with FDA 510(k) Approval.

# LATEX EXAMINATION GLOVES

Tronex disposable latex examination gloves are the "Gold Standard" for second-skin-like fit and feel. Formulated from the highest quality virgin latex, they provide outstanding barrier protection against viruses and pathogens, while offering exceptional tactile sensitivity, dexterity, durability, and resistance to tears and punctures.

## LATEX FEATURES

Tronex latex exam gloves are carefully manufactured using an advanced double-chlorination process to ensure exceptionally low protein content. They meet or exceed all industry standards for safety and quality, and comply with the following specifications:

- FDA 510(k) Approved for Medical Use
- ASTM D3578 Specification for Latex Examination Gloves for Medical Application
- ASTM F1671 Test Method for Resistance of Materials by Blood-Borne Pathogens (Viral Penetration)
- Available in Powdered and Powder-Free Styles
  - ▹ Powdered Gloves Feature Uniform U.S. Pharmacopeia (USP) Approved Premium-Grade Cornstarch

Featuring an ambidextrous fit with beaded cuffs for easy donning, these quality gloves are available in various sizes and styles.
