FACIAL PROTECTION

Disposable procedure and surgical face masks are intended to protect the respiratory system by blocking large-particle airborne substances or droplets from entering the nose or mouth, whereas N95 respirators are much closer fitting and designed to protect wearers from the inhalation of very small airborne particles and aerosols. For many healthcare applications, fluid-resistant surgical or procedure face masks offer sufficient protection; however, in instances where exposure to airborne viruses or aerosol contaminants is probable, N95 respirators may be the most appropriate choice.

All Tronex procedure face masks, surgical face masks, and NIOSH-approved N95 respirators are meticulously crafted with precision stitching and carefully manufactured in our ISO 9001-certified factories to provide optimal protection and durability while retaining fit and comfort for their intended applications.

PROCEDURE FACE MASKS

Constructed from multiple layers of soft, breathable, fluid-resistant material, Tronex disposable procedure face masks provide excellent protection and comfort.

FEATURES

- High Bacterial Filtration Efficiency (BFE) rates of $\geq 98\%$
- Soft Multilayer Nonwoven Material
- Quality Ultrasonic Bonding at the Edges to Maximize Both Performance and Fit
- Full-Length Malleable Nosepiece That Molds Comfortably to Facial Contours
- Fluid Resistant With 100% Latex-Free Construction

With Earloops

Item Code	Size	Packaging	Color
5040B	Unisize	50 masks/box, 6 boxes/case	Blue

With Earloops Packaged for Retail

Five-piece retail display pack; each face mask imprinted with "THE CHOICE."

SURGICAL FACE MASKS

Tronex disposable surgical face masks offer all of the safety, comfort, and quality features of our procedure masks with the added benefit of being rated for surgical use.

FEATURES

- FDA 510(k) Approved for Surgical Use
- ASTM F1862 Test Method for Resistance of Medical Face Masks to Penetration by Synthetic Blood
- ASTM F1215 Specification for Particle Filtration Efficiency: $\geq 99\%$
- ASTM F2299 Test Method for Determining the Initial Efficiency of Materials Used in Medical Face Masks to Penetration by Particulates Using Latex Spheres
- ASTM F2101 Test Method for Evaluating the Bacterial Filtration Efficiency (BFE) of Medical Face Mask Materials: $\geq 99\%$
- Fluid Resistant With 100% Latex-Free Construction

NIOSH N95 RESPIRATORS

Tronex N95 respirators are precision crafted and form-fitted to the face, providing effective protection against the inhalation of dangerous particulates and the transmission of airborne pathogens, per NIOSH 42 CFR Part 84 N95 respirator requirements. Our quality disposable respirators are designed for extended wear, offering an optimal seal for a wide range of facial structures.

FEATURES

- NIOSH N95 Approved for 95% Filtration Efficiency Against Particles (0.3 μ) and Aerosols Free of Oils
- Effectively Protect Against the Transmission of Airborne Pathogens: Avian (H5N1) and Swine Influenza (H1N1); Tuberculosis (TB); Dust; Pollen; etc.
- Meet CDC Guidelines for TB Exposure Control
- Comfortable, Latex-Free Head Straps
- Malleable Nose Bridge With Inner Foam Seal That Molds Securely and Comfortably to Facial Contours

NIOSH N95 RESPIRATOR FIT TEST KITS AND SUPPLIES

In full support of OSHA's mandated fit testing requirements, Tronex offers a full array of quality fit test kits and supplies to successfully conduct NIOSH N95 respirator fit testing. We offer a selection of Saccharin and Bitrex kits, solutions, and accessories.

Strategies for selecting the most appropriate respirator for each user and implementing proper usage and testing procedures are critical for ensuring optimal safety and protection. Tronex is honored to offer further support and assistance to healthcare facilities in any aspect of the fit testing process. Please contact your Tronex Account Manager for more details: **800-833-1181**.
